### Abstract:

By increasing the spread of vehicles in cities, subsequently pedestrian become less active in urban spaces. This causes unsafe, undesirable and risky spaces for citizens. Moreover noise pollution, air pollution and accidents caused by this spread, so, many countries tend to decrease these difficulties by finding solutions.

One of the effective solutions is tend to walking and make specific pedestrian paths for pedestrians. This paper will investigate some experiences in these fields in some countries.

**Keywords:**urban spaces,pedestrian paths, pedestrian.
